Design Considerations

Core principles reviewed when aligning furniture choices with workflow, brand expression, and long-term performance.

01

ERGONOMICS

Support posture, comfort, and day-to-day productivity with people-first furniture planning.

03

FLEXIBILITY & ADAPTABILITY

Favor solutions that can evolve with team growth, reconfiguration, and changing work styles.

05

DURABILITY & QUALITY

Prioritize commercial-grade performance, reliable details, and maintainable materials.

07

SUSTAINABILITY

Consider responsible material choices, long-life products, and efficient specification decisions.

02

SPACE OPTIMIZATION

Balance circulation, storage, and collaboration zones so the layout feels efficient and open.

04

AESTHETICS

Create a consistent visual language with finishes, materials, and forms that fit the brand.

06

TECHNOLOGY INTEGRATION

Plan around power, connectivity, and cable management so work settings stay clean and usable.

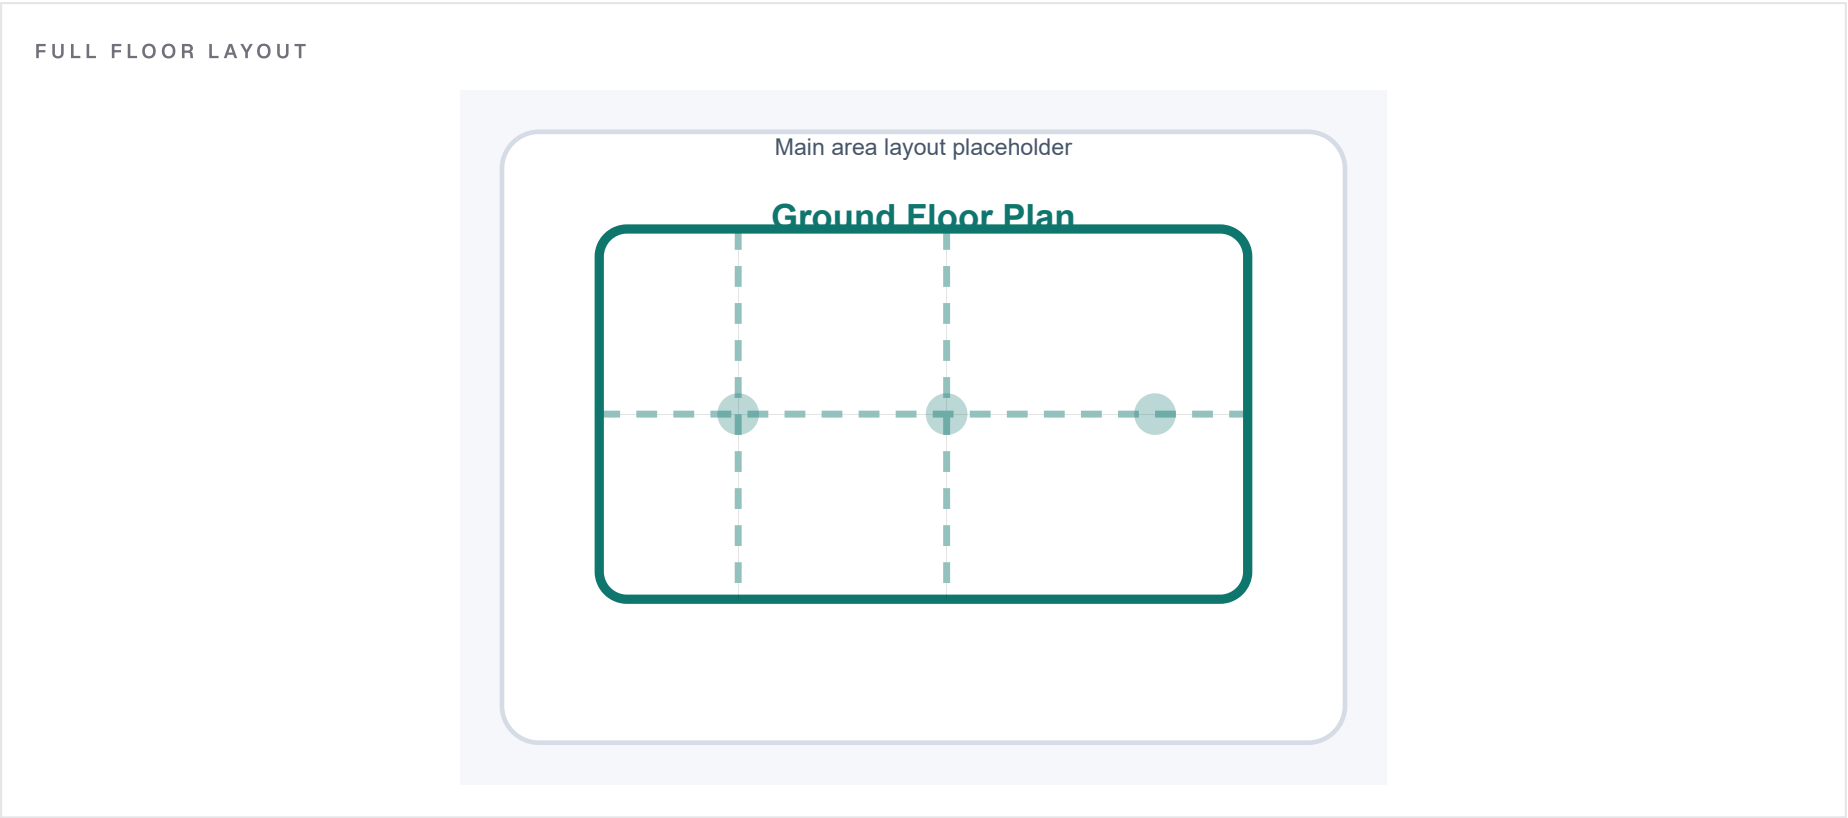

08

COST EFFECTIVENESS

Align visual impact and technical suitability with the project budget and lifecycle value.

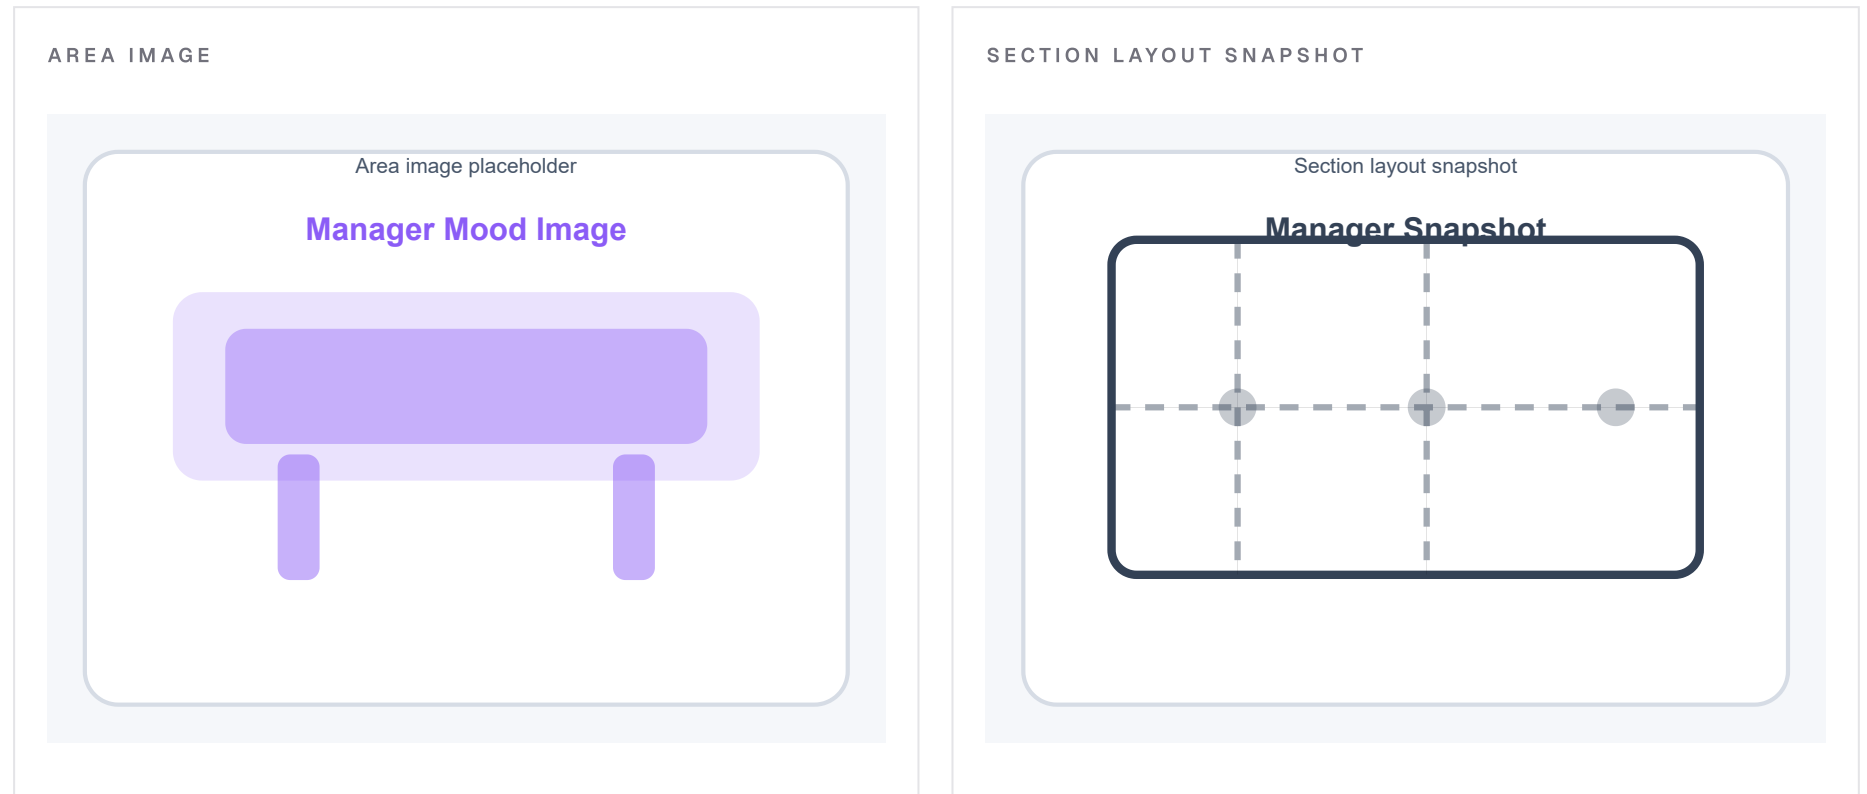

Ground Floor

Leadership and reception-facing furniture selections.

Manager

Executive workspace with premium desking and task seating.
